

APR[®] 6

PREMIUM - WAX/RESIN
FOR FLAT HEAD

THERMAL TRANSFER RIBBONS

APR[®] 6 is a highly sensitive premium wax/resin ribbon designed to give excellent printing performance at low energy. It can be printed on a wide range of substrates with the same level of performance.

The ink provides excellent printing quality for all types of barcodes, very small text, large characters and logos, at a blackness up to 2.1 (ODR).

The ribbon structure allows printing on a wide range of receptors, such as uncoated and coated papers and synthetics.

The printed image offers a good level of smudge resistance combined with heat resistance up to 100°C.

Those characteristics remain at speeds up to 300 mm/s (12 ips), and with 200, 300 and 600 DPI printheads, making this ribbon perfectly adapted to the labelling market.

APR[®] 6 grade features ARMOR's outstanding backcoat technology, ensuring excellent printhead protection, preventing clogging and static build-up.
